PROFILE SUMMARY

Test Lead / Senior QA Engineer with 7+ years of IT experience, including 6+ years at Tata Consultancy Services and 1.5+ years of onsite experience in Australia. Proven expertise in onsite QA delivery, offshore team management, client stakeholder coordination, and automation-driven quality assurance for large-scale retail and e-commerce platforms. Strong background in test planning, automation framework evolution, defect management, and business-focused testing, with demonstrated impact in risk reduction, cost optimization, and early milestone delivery.

WORK EXPERIENCE

Tata Consultancy Services (TCS)

Jan 2020 - Present

Test Lead | Senior QA Engineer | Automation

Client: Woolworths Group (Australia)

Onsite Experience: Sydney, Australia (May 28, 2024 – March 13, 2026)

- Managed distributed QA team (onsite & offshore) for monthly releases, improving regression efficiency through automation and AI-assisted test planning, supporting 50+ successful production releases.
- Led onsite QA delivery for a major Australian retail client, acting as the primary point of contact between cross-functional teams, including business stakeholders, development teams, and offshore QA teams, ensuring smooth coordination and delivery alignment.
- Drove in-person client interactions, sprint demos, and business discussions, enabling faster decision-making and improved delivery outcomes.
- Conducted store visits and business walkthroughs to understand real-world application usage and translate insights into meaningful test scenarios, improving functional and regression coverage.
- Provided automation leadership and technical guidance across mobile and web platforms using Selenium, Appium, and Playwright, with automation suites integrated with CI/CD pipelines, while leveraging AI as a testing support tool for test case generation, effort estimation, and test prioritization through project-specific optimized prompts, improving test coverage, planning accuracy, and execution efficiency.
- Acted as Subject Matter Expert (SME) and owned defect lifecycle management using JIRA, while suggesting and validating application decoupling workarounds that minimized delivery risk and enabled milestones to be achieved ahead of schedule.

Relationship Science India Pvt. Ltd.

Jul 2018 - Apr 2019

Research Analyst – Kofax Automation

- Worked with Kofax Robotic Process Automation (RPA) to build automation bots that simulate human interactions across web applications.
 - Developed bots to extract, validate, and structure business-critical data from web portals, reducing manual effort and improving accuracy.
 - Built workflows using Kofax Design Studio to automate login, navigation, rule execution, and data output generation.
 - Collaborated with analysts and business users to understand data requirements, validation rules, and delivery formats.
 - Improved operational efficiency by automating repetitive, high-volume data collection processes.
-

KEY COMPETENCIES, TECHNICAL SKILLS & AWARDS

- **Competencies:** Test Planning & Estimation, Onsite–Offshore Coordination, Client & Stakeholder Management, Automation Strategy & Framework Guidance, Defect Management & Release Readiness, Agile / Scrum Delivery, Business & Store-Level Validation, UAT, Risk Identification & Mitigation
- **Technical Skills:** Selenium WebDriver (Java), Appium, Playwright (JavaScript), Playwright MCP, TestNG, Postman, API Testing, JIRA, qTest, Core Java, JavaScript, PL/SQL, Azure, GCP, STLC, SDLC, CI/CD, Jenkins
- **Awards/Achievements:** Received multiple “Applause” and “On-the-Spot” awards for delivery excellence and automation improvements; Recognized as Best Performer at Tata Consultancy Services for on-time delivery with zero quality slippage.

PROJECTS

Enterprise Automation Framework Modernization

Retail Domain

1. Selenium Automation Framework (Java)

- Built and maintained Selenium WebDriver + TestNG frameworks using Java, supporting data-driven execution, reusable utilities, reporting, and cross-browser testing.
- Supported automation for business-critical workflows, improving regression efficiency and release stability.

2. Mobile Automation Framework (Appium)

- Extended automation coverage to mobile applications using Appium, enabling regression testing on real devices and emulators.
- Validated end-to-end mobile workflows across multiple devices and OS versions.

3. Modern Web Automation Framework (Playwright – JavaScript)

- Contributed to the transition from Selenium-based automation to Playwright automation using JavaScript, aligned with modern web architecture and faster execution.
- Automated complex and dynamic UI workflows for enterprise web applications.

4. Playwright MCP (Model Context Protocol) Integration

- Worked with Playwright MCP, a server-based automation capability that provides browser automation using Playwright.
- Enabled interaction with web pages through structured accessibility snapshots, bypassing the need for screenshots or visually tuned models.
- Improved automation stability and reduced flakiness for component-driven and highly dynamic user interfaces.

5. Real-Time Device & Cross-Environment Testing

- Enabled real-time device testing and cross-environment validation, reducing regression cycle time and improving release confidence.

EDUCATION

B.Tech – Information Technology

Jerusalem College of Engineering, Chennai
CGPA: 6.69

Jul 2014 – Mar 2018
